All custom enlarged sizes listed above come in professional quality glossy, matte, lustre and metallic photo paper (except for 24x36 which for some reason comes in a lustre and metallic finish only). Larger sizes are available upon request.

Metallic photo paper is a relatively new and striking alternative for many images. Metallic photo paper gives photos a beautiful finish with a metallic appearance that has been described as “chrome on paper.” Colors are deeper and richer with a subtle metallic sheen.

We sell 2 sizes that are not full frame images. As we do not crop our photos, please note that the 8x10 size is actually a 6x9 image on 8x10 paper with a 2”x1” border. The 11x14 size is actually an 8x12 image on 11x14 paper with a 3”x2” border. Borders come in black or white and are ready for matting and framing.
